SAMPSON COMMUNITY COLLEGE

EARLY CHILDHOOD EDUCATION

EDUCATION PROGRAMS

Career Track

The Early Childhood Education curriculum prepares individuals to work with children from birth through eight in diverse learning environments. Students will combine learned theories with practice in actual settings with young children under the supervision of qualified teachers.

Course work includes child growth and development; physical/nutritional needs of children, communication skills with families and children, and more. Students will foster the cognitive/language, physical/motor, and creative development of young children.

Graduates are prepared to plan and implement developmentally appropriate programs in early childhood settings. Employment opportunities include child development and childcare programs, preschools, public and private schools, and other school-age programs.
